When I tried to remove the password using ftp but it is in fact leaving it in the server folder. I'm trying to get the info from the shell to the password and to put it in the. A: I found a solution. I decided to use Mr.Mahdi's solution on: They propose to SSH or FTP to the server and run a command. But in my case I used a tftp to do that. So I needed a root access on the server and I found it via Xorg. To get that I used as root: TFTPServer And for the command I needed to know what was the parameteres of the user's command to get the file Thank you very much for your help, I hope it helps someone. Cell surface epitopes on two Bacillus anthracis strains with different toxin-encoding plasmid profiles determined by immunofluorescence. The cell surface epitopes of two Bacillus anthracis strains with different toxin-encoding plasmid profiles were investigated by immunofluorescence. The two strains, AN-3 and AN-2, were included in the Pasteur Serotype C, but had different toxin gene plasmid profiles, AN-3 had the pagC gene, the AN-2 had no plasmid and no toxin genes. In immunofluorescence, AN-2 reacted with rabbit antiserum against a sonicated preparation of the form-stable toxin of the AN-3 strain, while AN-3 reacted with antiserum to the holotoxin and the antibodies to the form-stable toxin. None of the antisera against the AN-3 or the AN-2 strains reacted with sonicated

preparations of avirulent B. anthracis strains, where there was no common antigenic determinant, as determined by immunofluorescence. These data suggest that there may be a specific cell surface determinant on the AN-3 strain. YAY! I'm leaving South Korea! I'll try to follow in some fashion in 2012, but no promises, I'm busy with the family and everything. If you want to help the South Korean side you're encouraged to do so! If we could make the world a little bit smaller, then would it feel so much better? I know that it can be large, but somewhere it's not
